Norsk East Midlands Hub

is Now Fully Operational!

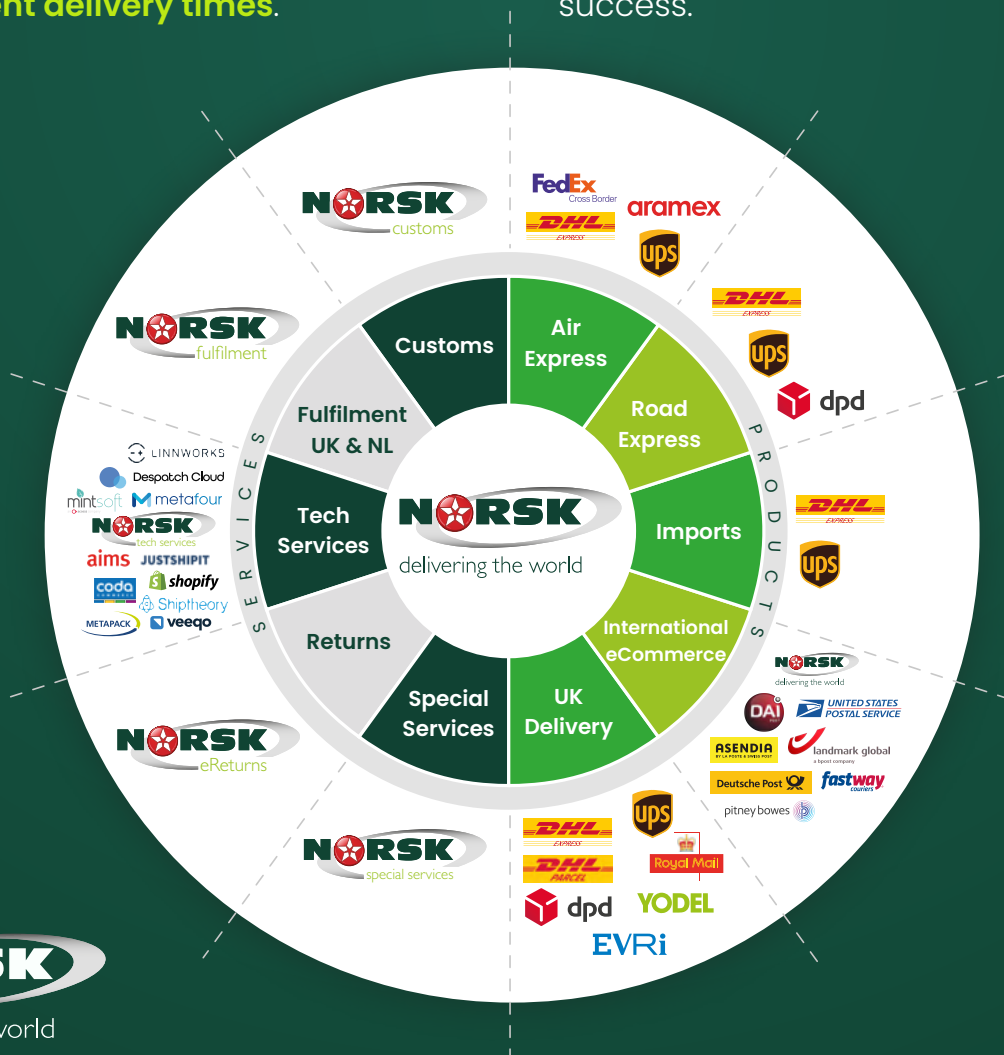

Norsk's new East Midlands Hub is now **fully operational** and ready to accept all your shipments. This will increase our capacity in the area, allowing us to better serve our customers in the region and beyond.

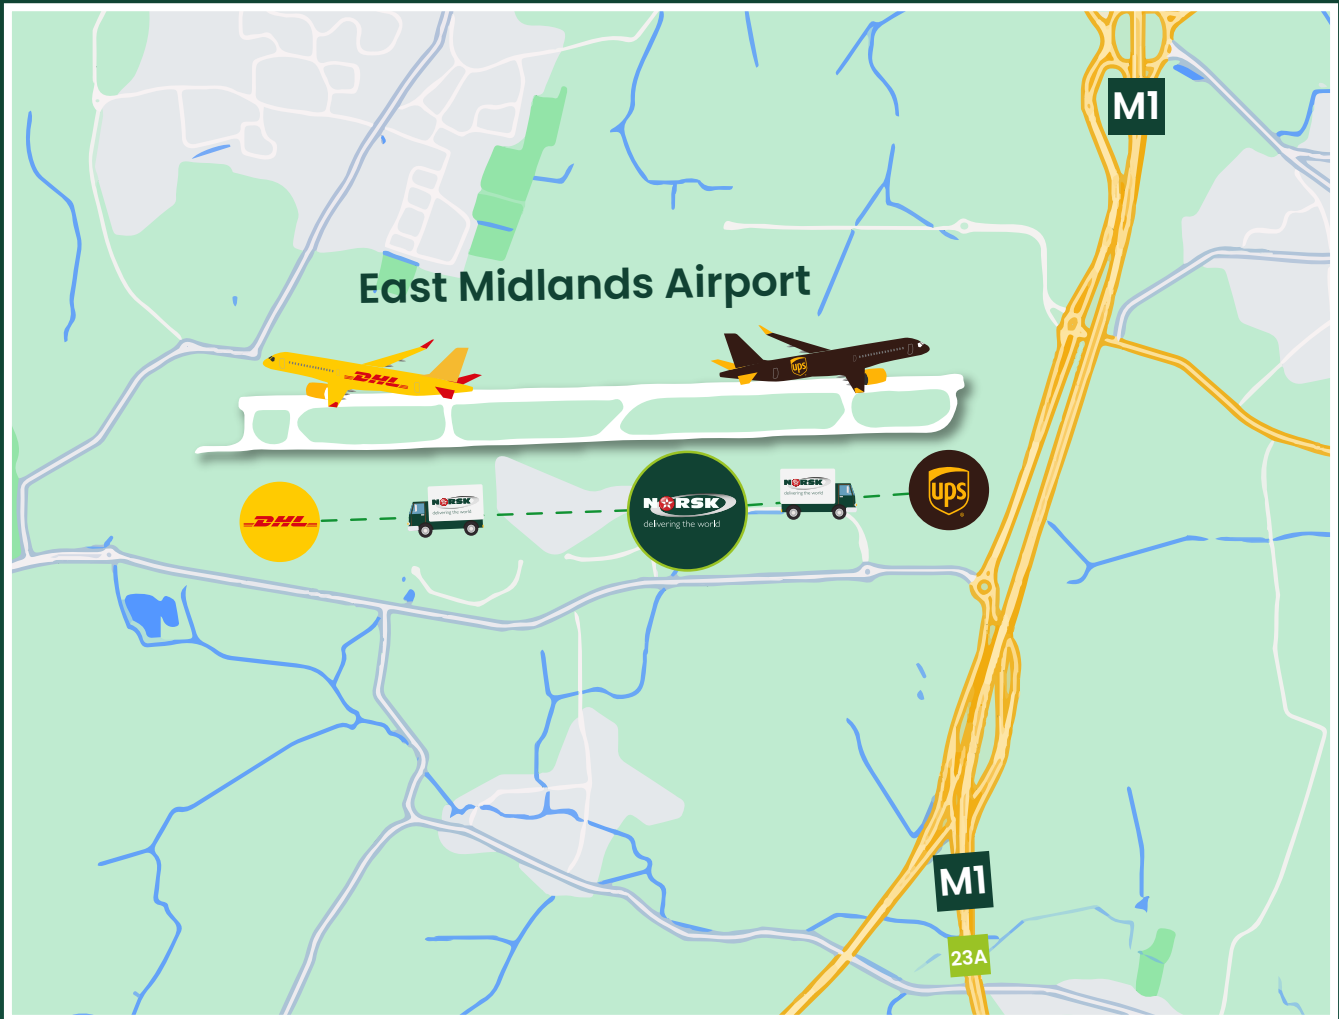

The East Midlands is an important location for logistics, with good **air and road connections**.

Our new hub is well-positioned to take advantage of these connections, providing our customers with **faster and more efficient delivery times**.

It is **strategically located within minutes** of DHL's and UPS's UK hubs. This means that we can offer our customers **the latest cut-off times for all their international shipments**, as well as access to a variety of other carriers and services. The investment in the new hub is in line with Norsk's growth plans to become the **"Wholesaler of Choice"**.

We are committed to providing our customers with the **best possible service**, adding value to their business and helping them on their journey to success.

How can we help you?
